ICT Technical Consultant

As a ICT Technical Consultant, I am here to assist you in finding the best tech solutions to improve your IT setup. I will work closely with you in order to understand your needs, then design and implement systems that fit those needs with the necessary technology. I also offer ongoing support and troubleshooting to ensure everything runs smoothly and securely. While doing this, I stay up to date on the latest industry trends to ensure the solutions I provide are cutting-edge and effective. My goal is to make your IT infrastructure more efficient, reliable, and secure.

Educational Background & Certifications

- Final Year Student at NUST studying Bachelor of Computer Science Majoring in Communication Networks
- Cisco Certified Network Associate: Introduction to Networks
- Cisco Certified Network Associate: Switching, Routing, and Wireless Essentials
- Cisco Network Addressing and Basic Troubleshooting Badge
- Cisco Networking Basics Badge
- Cisco Networking Devices and Initial Configuration Badge
- Cisco Network Support and Security Badge
- Cisco Network Defense Badge
- Cisco Computer Hardware Basics Badge
- Extreme Networks Certified Associate in Solutions Selling
- Extreme Networks Solutions Selling – Extreme Sales Pitch
- Extreme Networks Solutions Selling – Outcome Based Selling
- Extreme Networks Solutions Selling – Sales Proposal
- Extreme Networks Solutions Selling – Demonstrating Value
- Extreme Certified Professional in Solutions Selling
- Extreme Networks Certified Associate in Solutions Design
- Fortinet Getting Started in Cybersecurity
- Fortinet Certified Fundamentals in Cybersecurity
- Fortinet Certified Associate in Cybersecurity
- Sedco CEM – CVM Branch Technician
- Sedco CEM – CVM Technical L1
- Cisco Small and Medium Business Engineer
- Cisco Small and Medium Business Sales

CCNAv7: Introduction to Networks

The student has successfully achieved student level credential for completing CCNAv7: Introduction to Networks course administered by the undersigned instructor. The student was able to proficiently:

- Configure switches and end devices to provide access to local and remote network resources.
- Explain how physical and data link layer protocols support the operation of Ethernet in a switched network.
- Configure routers to enable end-to-end connectivity between remote devices.
- Create IPv4 and IPv6 addressing schemes and verify network connectivity between devices
- Explain how the upper layers of the OSI model support network applications.
- Configure a small network with security best practices.
- Troubleshoot connectivity in a small network.

CCNAv7: Switching, Routing, and Wireless Essentials

The student has successfully achieved student level credential for completing CCNAv7: Switching, Routing, and Wireless Essentials course administered by the undersigned instructor. The student was able to proficiently:

- Configure VLANs and Inter-VLAN routing applying security best practices.
- Troubleshoot inter-VLAN routing on Layer 3 devices.
- Configure redundancy on a switched network using STP and EtherChannel.
- Troubleshoot EtherChannel on switched networks.
- Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols.
- Configure dynamic address allocation in IPv6 networks.
- Configure WLANs using a WLC and L2 security best practices.
- Configure switch security to mitigate LAN attacks.
- Configure IPv4 and IPv6 static routing on routers.

Certificate of Course Completion

Michael Amutenya

has successfully achieved student level credential for completing the Network Addressing and Basic Troubleshooting course.

The student was able to proficiently:

- Explain how physical layer protocols, services, and network media support communications across data networks.
- Explain how media access control in the data link layer supports communication across physical and logical networks.
- Explain how routers use network layer protocols and services to enable end-to-end connectivity.
- Implement an IPv6 addressing scheme.
- Describe Cisco routers and switches.
- Troubleshoot basic network connectivity issues.

Certificate of Course Completion

Michael Amutenya

has successfully achieved student level credential for completing the Networking Basics course.

The student was able to proficiently:

- Explain important concepts in network communication, network types, components, and connections.
- Explain the importance of standards and protocols in network communications.
- Explain how communication occurs on Ethernet networks.
- Explain the features of an IP address and IPv4 addresses are used in network communication.
- Explain features of IPv6 addressing.
- Explain how routers connect networks together.
- Use various tools to test and troubleshoot network connectivity.
- Configure an integrated wireless router and wireless client to connect securely to the internet.

Certificate of Course Completion

Michael Amutenya

has successfully achieved student level credential for completing the Networking Devices and Initial Configuration course.

The student was able to proficiently:

- Explain components of a hierarchical network design.
- Calculate numbers between decimal, binary, and hexadecimal systems.
- Explain how Ethernet operates in a switched network.
- Calculate an IPv4 subnetting scheme to efficiently segment a network.
- Explain how ARP enables communication on a local area network.
- Explain how DNS and DHCP services operate.
- Compare the operations of transport layer protocols in supporting end-to-end communication.
- Use the Cisco IOS and build a simple computer network using Cisco devices.

Certificate of Course Completion

Michael Amutenya

has successfully achieved student level credential for completing the Network Support and Security course.

The student was able to proficiently:

- Demonstrate effective troubleshooting methodologies and help desk best practices.
- Explain common threats, vulnerabilities, and attacks on end points.
- Configure secure user access on a network.

Certificate of Course Completion

Michael Amutenya

has successfully achieved student level credential for completing the Network Defense course.

The student was able to proficiently:

- Use cybersecurity concepts to document a network security posture.
- Configure security measures on network devices and Linux and Windows endpoints.
- Implement phases of identity lifecycle management.
- Configure a simulated network firewall.
- Recommend cloud security measures given a scenario.
- Determine the appropriate data protection mechanism to ensure secure transport and storage of network data.
- Explain how the public key infrastructure (PKI) is used to enhance data security.
- Implement virtual computing environments.

Certificate of Course Completion

Michael Amutenya

has successfully achieved student level credential for completing the Computer Hardware Basics course.

The student was able to proficiently:

- Install components to build, repair, or upgrade personal computers.
- Describe common device hardware and preventive maintenance.
- Explain the features and functions of laptops.
- Explain the features and functions of mobile devices.
- Define general and fire safety standards.
